"STYLE it" Design Möbelfüße

Mit dieser Broschüre ergänzen wir unseren Hauptkatalog "Möbelkomponenten" um außergewöhnliche Design-Möbelfüße für Polster- und Korpus-Möbel.

Anspruchsvolles Design aus den Materialien Edelstahl, Stahl, Aluminium- und Zinkdruckguss in Verbindung mit hochwertiger Verarbeitung verleiht Ihrem Produkt einen ganz besonderen individuellen Stil, oder "STYLE it" wie wir es nennen.

Hohes handwerkliches Können, kombiniert mit modernsten Fertigungsverfahren, ermöglicht fließende Formen die insbesondere die Produkte aus Edelstahl durch Ihre Leichtbauweise einzigartig werden lässt. Darüber hinaus realisieren wir mit dem Fertigungsverfahren Druckguss spezielle Formen zu vertretbaren Investitionskosten, die in anderen Produktionsverfahren und Materialien nicht mehr wirtschaftlich herstellbar sind.

Ein weiteres Unterscheidungsmerkmal der "STYLE it" Kollektion ist das sehr breite Spektrum der möglichen Oberflächen. Neben polierten, gebürsteten, lackierten Oberflächen, haben wir je nach Material und Fertigungsverfahren besonders edle galvanische Effekte im Portfolio. Erwähnt sei hier die "Gun-Metal"-Effektbeschichtung, Schwarz-Nickel, Matt-Nickel, Antik-Kupfer, aber auch Hochglanz- und Mattverchromungen sowie Bronze, Messing oder Gold-farbige Oberflächen sind möglich.

Bitte sprechen Sie uns an, gerne entwickeln wir mit Ihren Designern und unseren Möglichkeiten neue kreative Produkte in Form oder Oberfläche. Dabei sind wir getreu unserer Unternehmensphilosophie "connecting markets" nicht limitiert in Bezug auf Produktionsmöglichkeiten, Formen, Materialien, Oberflächen, Preissegmenten und Investitionskosten.

"STYLE it" Design furniture legs

With this brochure, we update and supplement our main catalog "Furniture Components" with extraordinary design furniture legs for upholstery and cabinet furniture.

Sophisticated design in high-quality workmanship made of the materials stainless steel, steel, aluminum and zinc die-casting gives your product a special style or as we say "STYLE it".

High craftsmanship, combined with modern manufacturing processes, allows for flowing forms, which in particular make the products made of stainless steel unique by their lightweight construction. In addition, we are able to produce special shapes at a reasonable cost of production, which are no longer economically profitable in other production processes and materials.

Another distinctive feature of the "STYLE it" collection is the wide range of possible surfaces. In addition to polished, brushed, lacquered surfaces, we have noble galvanic effects in the portfolio depending on the material and production process, e.g. "Gun Metal" effect coating, black nickel, matte nickel, antique copper, high gloss or matte chrome, but also bronze, brass or gold-colored coatings are feasible.

Talk to us whether particular forms or surfaces, we develop with your designers and our possibilities new creative products, herewith we following our corporate philosophy "connecting markets" which is not limited in terms of production facilities, forms, materials, finishes, price segments and investment costs.

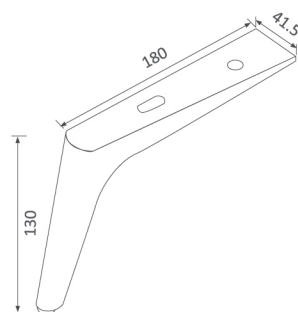

BB-0008-E / S

Höhe / Height: 120 / 130 mm

Edelstahl / Stainless Steel: Polish, Brush

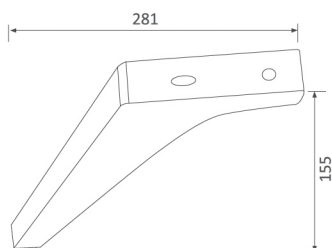

Stahl / Steel: Chrome

BB-1150-E

Höhe / Height: 155 mm
